

AHAB LATIF

MERN Stack / Full-Stack Software Engineer

Lahore, Pakistan • +92 313 4138667 • muhammadahab8055@gmail.com • [linkedin.com/in/muhammad-ahab](https://www.linkedin.com/in/muhammad-ahab)

PROFESSIONAL SUMMARY

Full-stack Software Engineer with 4+ years of experience designing and shipping production web and mobile applications using the MERN stack, Next.js, and cloud-native architectures (AWS, Serverless, Kubernetes). Proven track record delivering AI-integrated platforms, real-time streaming systems, and scalable SaaS products end-to-end — from RESTful/GraphQL APIs to CI/CD deployment. Comfortable owning features across the stack and collaborating closely with cross-functional teams.

TECHNICAL SKILLS

Languages:	JavaScript, TypeScript, Python
Frameworks:	React JS, React Native, Node JS, Express JS, NestJS, Next JS, Flask, FastAPI
Databases:	MongoDB, PostgreSQL, MySQL, Supabase, DynamoDB
Cloud & DevOps:	AWS (Lambda, ECS, S3, SST, Serverless), Docker, Kubernetes, Pulumi, Git/GitHub Actions
APIs & Realtime:	REST, GraphQL, WebSockets, Pub/Sub, Streaming
Other:	FFmpeg, Bash

PROFESSIONAL EXPERIENCE

Software Engineer | Optima Geeks

Sep 2024 – Present

- Architected EOS, a live-streaming and cutting platform on AWS (ECS, S3, Lambda, EventBridge, SQS, Pulumi) with AI-based transcription of live and cut video clips.
- Engineered Gradcut, a microservices-based live-streaming platform on Kubernetes that performs automated live video cutting with FFmpeg for university graduation ceremonies.
- Launched Happy Hour Hound, a MERN-stack web scraping platform that ingests restaurant URLs and automatically extracts and refreshes happy-hour deal data on a schedule.

MERN Stack Developer | Qbatch

Mar 2023 – Sep 2024

- Delivered Ronny Innovation and 3PL Terminal, MERN-stack store/warehouse management platforms for Amazon and Walmart sellers, using CRON jobs, Swagger docs, and automated test suites.
- Rebuilt the frontend of Prepare4u in React, migrating the backend from Flask/Python to a Node.js/PostgreSQL stack for Amazon store management.
- Designed and maintained a company-wide Performance Management dashboard (React, Serverless Node.js, MySQL) for tracking goals and tasks.
- Delivered Le Gourmet, a full restaurant management system (React, React Native, Node.js, Serverless, Sockets) supporting customer, manager, cashier, chef, and admin roles with real-time notifications.

Software Engineer | Devrol Solution

Mar 2022 – Feb 2023

- Contributed as a MERN stack developer across client projects, strengthening skills in scalable API design and cross-functional collaboration.

Software Developer | Asapp Studio

Feb 2021 – Feb 2022

- Shipped Cogen, a recruitment web and mobile platform (React, React Native) supporting company, recruiter, and candidate user types.
- Designed Rental Booth, a MERN-stack booth-rental marketplace with Stripe payment integration for salon seat bookings.
- Created and maintained SullyMac, a network device management system (React, Django/Python, MySQL) for monitoring devices across a network.

SELECTED PROJECTS

Qcreates — qcreates.com

Next.js, Clerk, PostgreSQL, Amazon SST, Drizzle ORM

AI-powered product photography platform that generates studio-quality product images without a physical photoshoot, optimized for e-commerce and social channels.

Stax Fun — stax.fun

React, Flask, PostgreSQL, Nginx, Stripe

AI-driven, Scratch-inspired visual coding platform that lets users of all ages build games and simulations with an AI copilot for suggestions and debugging.

Croptalk — croptalk.ai

Next.js, Clerk, DynamoDB, FastAPI, OpenAI, LangChain

AI chatbot for crop and plant information that gives farmers data-driven suggestions, with chat history storage and user feedback loops for improving AI responses.

Edit on the Spot (EOS) — www.editonthespot.com

React, TypeScript, Auth0, IVS, ECS, S3, Lambda, EventBridge, SQS, Pulumi

Multi-tenant live streaming platform supporting real-time stream cutting and editing, engineered to scale horizontally with demand.

TamTracker — tamtracker.io

Next.js, SST, SQS, Lambda, PostgreSQL

Lead-generation platform that connects marketing channels (LinkedIn Ads, Google Ads, HubSpot) so users can analyze and manage incoming leads in one place.

Patrol 6 — patrol6.app

Next.js, Trigger.dev, tRPC, PostgreSQL

Guard-patrol monitoring app that ingests live wearable-device footage and uses AI to detect and categorize incidents during security walks.

MS Medi — msmedi-v1.mssalepoint.com

React, Node.js, Express, MongoDB, CRON jobs

Medical point-of-sale system for pharmacies handling sales, purchases, real-time inventory, and financial reporting with role-based admin permissions.

Gradcut — www.gradcut.com

Python, React, Next.js, Kubernetes, Docker, FFmpeg, PostgreSQL, Cognito

Microservices-based live-stream cutting platform for university graduation ceremonies that automatically delivers each student their individual clip.

Cropguard — www.cropguard.ai

Next.js, Clerk, PostgreSQL, Django

Crop and plant management dashboard that tracks crop data and runs analysis to help farmers reduce risk.

SullyMac SysMon — sysmon.sullymac.com/login

Django, React, PostgreSQL

Web platform for deploying and managing Sysmon configurations across Windows environments, giving admins visibility into process, network, and file-system activity for security monitoring.

MOMS (SecureResi) — moms.securesresi.com

PostgreSQL, Node.js, React, Bull Queue

Security operations module within the SecureResi platform, integrating with VMS, BMS, SCS, and GPS systems for real-time incident monitoring, management, and reporting.

EDUCATION

Bachelor of Science, Computer Science

Virtual University of Pakistan • 2018 – 2023 • CGPA 3.0+

LANGUAGES

English, Urdu
